COMPANY PROFILE

OUR HISTORY

ALB-STAR Ltd, was established in 1995 in Fier, where continues to exercise its main activities. Increasing market demands for engineering services and construction, had an immediate impact in this company, which was followed by the opening of the new offices in Tirana in 2003.

ALB-STAR Ltd is one of the biggest companies in Albania in the field of engineering services, especially in hydraulic works, such as water supply, sewerage, monitoring and control systems, river protection; in transport infrastructure, such as roads, highways, bridges and other important works, in environmental protection, such as waste water treatment plants, ecological pits, in mechanical industry, such as manufacture of metal tanks, manufacture of metal structures, mechanical works for the oil and gas industry, pressure retaining vessels.

The company operates and provides services in special works; micro-tunnels, geomembrane welding and etc, compounded of specialized staff and having the relevant equipment.

The Company is also specialized in the field of the design of civil and industrial works.

ALB-STAR Ltd has expanded its operations throughout the country, Tropoje, Kukes, Lezhe, Rubik, Elbasan, Pogradec, Berat, Vlore, Korce, Gjirokaster, Himare, Sarande. Now, it is also present in Kosovo with its own representative office, for the implementation of several projects in the field of water supply.

During these years of its activity, the company has worked mainly in the implementation of projects financed by World Bank, German banking group KFW, Phare Program, Albanian Development Fund, Dutch government, Italian Cooperation, European Delegation etc. Meantime, at the list of the fulfilled works, successfully completed by the company, are not missing projects financed by the Albanian government.

Philanthropy Award 2014!

Award for Business Entities Contributing at the Local Level

Showing sensibility and contributing to the development of local community, environmental protection, social and economic development.

Supporting continuously non-profit organizations, institutions, communities, and individuals, in support to a common good.

Exercising own activities lawfully and in accordance with ethical standards toward the community, the environment or personnel of their company.

Demonstrating clear and measurable results of their contribution given until the time of nomination.

Having a local and national geographic coverage in their philanthropic activity.

We will operate a commercially successful business. Success to us, means providing strong returns for our shareholders, and consistently delivering quality projects for satisfied clients.

Our "can-do" approach, will enable us to develop long-term, mutually beneficial relationships and become a partner of choice.

Structure of the group

The Albstar Group operates through four separate Business Units: Albstar, Vibtis, Asab, Apm.

Each Business Unit comprises a number of divisions, which are registered in their respective field of operation.

Albstar Group also operates a series of Associated Businesses across the region. The Associated Businesses are formed through strategic joint ventures, with leaders in their respective industries and provide specialist services in different services, foundation engineering, water treatment, rail and water-related infrastructure.

Albstar Group aims to be the leading diversified international contractor in the Balkans.

Community

Albstar recognizes that, wherever we operate, we are a guest of the local community, and we endeavor to minimize the impact of our work on residents and their environment

We encourage communication, and consultation with the local communities who may be affected by our work. As part of our commitment to supporting communities, the Group offers financial support for community-driven initiatives, that provide maximum benefit for local residents.

Our history

2003
Opening of ALBSTAR office in Tirana, Department of infrastructure and Environment

2004
Start of a long-term relationship with Bankers Petroleum Company, through service contracts.

2005
Start of the "Fier Water Supply" project founded by the World Bank.

2006
Installation of Bulk Water Meters in Durrës, Lezhë, Sarende dhe Fier. The first Project in Albania that provides transmission of data with long distance, in Water Supply sector.

2007
Construction of the Treatment of Sewers plant in Vlorë.

2008
Certification of ALB-STAR shpk with Quality Control System UNI EN ISO - 2000

2009
Inauguration of the first Representative Office of ALB-STAR shpk in Kosovo, accompanied with 5 new working contracts.

2010
Environmental Protection of Lake Ohrid - Sewerage Prograde - Phase I & II.

2011
Rehabilitation of the Water Supply System in Peja, Istog and Klina

2012
Rehabilitation of the Water Supply System in Peja and Prizren L. OT 1,2 & 3

2013
Civil construction works of an access road, small structures, bridge and drilling location for Molisht-I exploratory well, block 2-3, onshore ALBANIA.

Company Operations

Our Staff

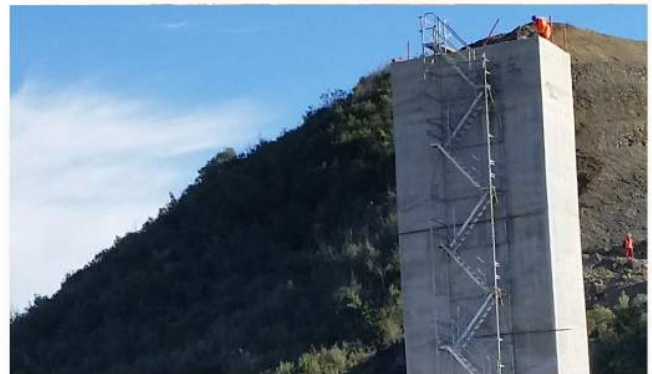

The company is based on its own qualified personnel, which are a guarantee for a good performance during the implementation of projects.

All the projects are executed in accordance with Nation and International Standards, respecting Quality, Safety and Environment. Employment of young specialists with high perspective and continuous training of personnel have yielded positive results to ensure success way.

Values

Our client's satisfaction is a constant measure of achievement for our team. While there is no doubt that this satisfaction is due to our commitment to our clients, it is also directly related to the values through which ALBSTAR shpk. manages its operation. These include: Leadership, Innovation, Integrity, Honesty, Fairness, Individual Contribution, Reliability, String Work Ethics.

Quality Health and Standards Leading the way

Quality Health and Safety and Environmental Management are top priorities for the company.

Quality for us is building trust. We want our clients, employees and partners to trust that ALBSTAR will understand their needs, and meet their expectations. Albstar uses the ISO 9001:2008 standard as a framework for establishing and monitoring its quality management systems

To achieve quality we invest a huge amount of time and effort making sure we can, and do, deliver what we promise. As a result, our quality management systems ensure that we provide professional and experience management and workforce, straightforward operating procedures, engineering expertise and independent oversight monitoring and checking.

OHSAS 18001:2007

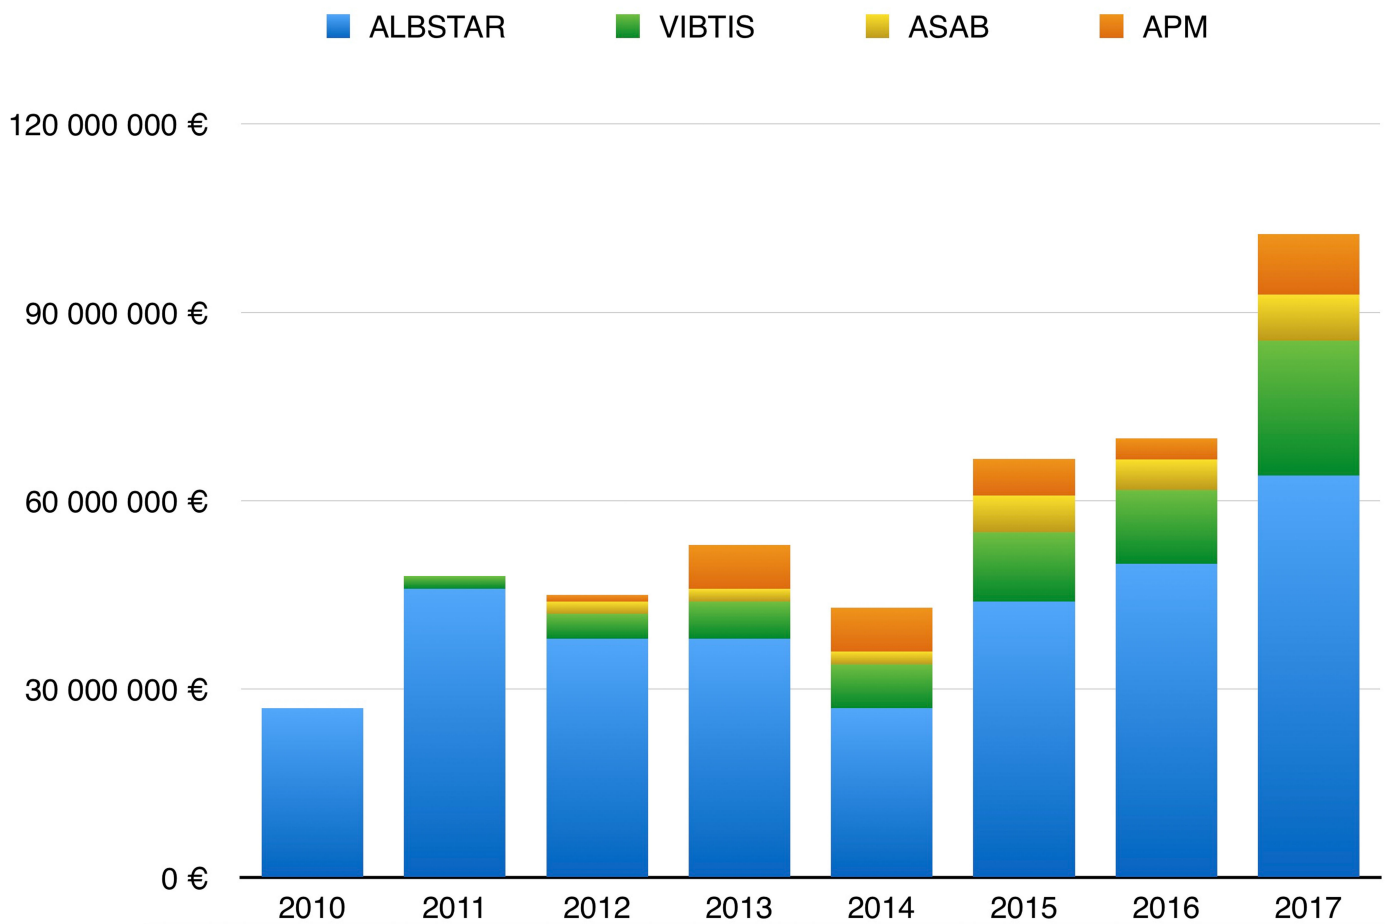

We simply cannot injury or damage to health in the pursuit of our business objectives. As a framework for establishing and monitoring its occupational health and safety management systems.

ISO 14001:2004

The main scope for us is to establish and to develop a system that is friendly with the environment, so we have implemented the environmental management system according ISO 14001:2004

Our Experience

INFRASTRUCTURE

Balkan demands for infrastructure development are extensive and diverse. And, when it comes to Infrastructure, we offer an array of capabilities that few can match: Roads, Sewage System, Waste Water Treatment Plant, Water Supply, Drinking Water Treatment, Ecological Pits

DESIGN AND ENGINEERING

One entity is responsible for the design, engineering and construction. We Provide a single source of responsibility to the Client. We work to develop and understand project expectations and then manage these needs with a qualified design team.

CIVIL WORKS

Albstar's building expertise encompasses airport and seaport developments, water supply treatments developments, industrial facilities, hydroelectric plants also bridges and tunnels in different areas.

Sewerage and WWTP Shirokë

During the last years ALB-STAR shpk has paid great attention to several Projects in Infrastructure.

Until now ALBSTAR has rehabilitate and recontructed about 70 km of asphalt roads in Albanian Projects.

The company has successfully compleated the reconstruction fo the Roads such as:
Himare e Vjeter - Potam
Korite - Liqenas
Ruzhdie - Siqec
Sevaster to Kalivac
5 Maji - Selaudin Zorbat
and the construction of 3 km asphalt road Unaza e Re- Mulllet.

Details

Our project in Shiroke for KFW and ADA and SECO had e value of 1.400.000€ and comprised all the following processes: Screening, Pumping, Aerating, Removing Sludge, Removing Scum, Killing Bacteria, Wastewater Residuals.

This means that we did a 360-degree improvement of the water system, including rock removal, dead animals removal into a "chlorine contact" tank, which is used to kill bacteria. The work done here was not only important fro Shiroke, but also the whole Northern Albania

Water Supply Project Pogradec

Details

The sustainable provision of safe and reliable drinking water remains as the major challenges facing both the developing and industrialized in the world.

The issues of water supply are dealt with in depth in the water Supply Engineering of Albstar Group.

This was one of the main problems in Pogradec and our group won this contract of improving not just water but even the life style of the city.

We finished everything in one year and the project was high standard.

Details

The widest Highway constructed in ALBANIA.
The scope of work also includes the construction of 2 interchanges and 3 kilometers of service roads.

The Package is the last 75 kilometers and includes a major bypass where the road alignment deviates from that of the existing to avoid the populated urban area of Mullet with a second minor bypass to improve the road alignment.

Construction of Road Unaza e Re - Mullet

Pedonalja Korce, Albania

Details

AADF has signed a contract with the Albstar for the construction of infrastructure integral to the Pedestrian road in Korca.

Albstar will deliver the project across multiple work fronts including the improvement and landside operational areas.

The road was 670 meter long and a width of 9500m. Central to the stories of and old city the road strongly held values.

This project encompassed a passionate belief in education, environmental sustainability, heritage and culture.

The Pedestrian has been one of the loveliest places, for the and it is connected to the spirit of the city so the project was not just infrastructure but holds a lot nostalgic moments from the past of the city.

Waste Water Treatment Plant Korçe

Details

The contract involves the construction of the Waste Treatment Plant in Korce, Albania. Building phase comprises a total built-up area of around 130000 square meters.

The project represents the waste water treatment plant in this area to improve the climate and the whole field of the villages around the city.

Waste water treatment plant is positioned as a mid- to premium-project with targeted of completing the request of EIB and KFW on finishing the project with the latest technology.

The engineers of the project were trained to work in European standards and did reach a high quality of the work needed.

Civil construction works of an access road

Civil construction works of an access road, small structures, Bridge and drilling location for Molisht-1 exploratory well, block 2-3, onshore Albania

Performing diligently saving precious time for the client demands.
15,000 m² drilling site and 15 km gravel road accessible for heavy machineries for drilling operations within 42 Days.

Total Complete project duration incl. finalization of the bridge, outstanding finishing works, guardrails in 76 days

Civil construction works of an access road

Civil construction works of an access road, small structures and drilling location for Shpirag-3 exploratory well, block 2-3, onshore Albania

Works including 15,000 m² drilling site and gravel road accessible for heavy machineries for drilling operations.

All works completed within 60 days.

Lining of pond for hazardous process waste.

Construction of Replacement Roads and Bridges

Construction of 9.4 km asphalt paved road including 11 bridges of different typology

- Pre stressed concrete

- steel girders.

Longest bridge 520 meters.

Construction of Replacement Roads and Bridges

Construction of New Bridge

New bridge has a total length of 90 m and it consists of 3 spans.

The bridge is 10.88 m wide with a lane width of 2x3.94 m and 2 sidewalks of 1.50 m.

It is designed according to the Italian upload scheme CNR4 for bridges of first category.

**Construction of New Bridge
Beline-Kallm over Seman River,
Fieri Region**

Construction of Road "Himarë e Vjetër Potam"

PETROLIFERA

CONSTRUCTION OF STEEL STRUCTURES AND INSTALLATION OF STEEL PIPELINES AT PETROLIFERA IA, IN VLORA HARBOUR

More than 20 km of oil and gas pipeline welded and tested according to the highest international standards ,API Steel supports and brackets on offshore and onshore installations

Reconstruction of road

Reconstruction of Road Stermas-Picalle, Tirana Region

Rehabilitation of app. 15 km roads complete with necessary infrastructure.

Engineering Diversity nature as:

in steep hills,
rocky or soil improvement,
within the city suburbs
mountain crosses
sliding protection measures
etc.

Reconstruction of road

Upgrading of engineering infrastructure including sewerage, road layers, boundary walls, street lighting system etc. in dense inhabited area in Capital city of ALBANIA

OIL INDUSTRY

Civil Construction and Services in Oil Industry Bankers Petroleum investment

Full approach in Engineering solutions from design to the finalization of civil and infrastructure works, construction, production, erection of steel structures, different size tanks to meet the client demands.

Metallic works in Oil Industry (Bankers Petroleum)

With professionalism and Quality control according the world best practice and standards.

Construction of I-st phase of Tirana Logistic Park

New warehouse 15,557 m² as a 1st phase project of the highest logistic park in Albania.

Construction of New Roads and pads
7164 m² in asphalt, 3186 m² in outdoors industrial concrete slabs, 14,520 m² in gravel

Landscaping

Completed with necessary engineering infrastructure, as water supply, sewage, storm water, power supply, pumping stations, well, IT, fire detection system, electromechanical works, etc.

Water Supply Emergency Works

Fier Water Supply Emergency Works

Rehabilitation of Water Supply System in Vlora

Installation of Water Supply
HDPE pipes DN160 – DN1000
within the city area Length ~ 54 km
Implementation of the Pilot
area for secondary sewerage
system in the coastal area

CONSTRUCTION OF WASTE NEW BUILDING ACC AND NEW TOWER

PROJECT NUMBER:	AL/WAT/COP/97/03
LOCATION:	TIRANE, ALBANIA
FINANCED BY:	NATIONAL AIR TRAFFIC AGENCY (NATA SH.A)
EMPLOYER:	NATIONAL AIR TRAFFIC AGENCY (NATA SH.A)
ADDRESS OF EMPLOYER:	AIRPORT "NENE TEREZA" RINAS, TIRANE, ALBANIA
